

Planning Commission Comments – December 12, 2017

Case TC1700006

AL-TURK – Technical Updates Regarding Sedimentation and Erosion Control and State Legislation

I voted for approval.

BRINE – These changes were made necessary by changes in state law and by requests from Sedimentation and Erosion Control. Although I disagree with some changes mandated by state law (see section 3.8.6 for example), I voted to recommend approval.

BUZBY – I don't like the new state laws that move us backwards on protecting sedimentation and erosion control standards.

However, this proposal ensures we conform with state law, which is necessary, so I vote to approve.

GIBBS – Hopefully state law will not inhibit, prohibit any actions Durham Co, may need to implement.

HYMAN – Voted yes: moving forward with a favorable recommendation.

KENCHEN – I vote to approve. Great job by staff.
