

## ATTACHMENT 6: COMPREHENSIVE PLAN CONSISTENCY ANALYSIS

As directed by paragraph 3.4.7 of the Unified Development Ordinance, staff has reviewed the requested Zoning Map Change for consistency with all relevant policies of the Comprehensive Plan. That analysis is shown below.

**2.3.1a. Contiguous Development.** *Support orderly development patterns that take advantage of existing urban services, and avoid, insofar as possible, patterns of leapfrog, noncontiguous, scattered development.*

**Staff Analysis:** If approved, the request would permit up to 31 single-family residential units at the subject site. Development at this scale and intensity is similar to adjoining properties.

**2.3.2a. Infrastructure Capacity.** *In evaluating changes to the Future Land use Map and Zoning Atlas, the City-County Planning Department shall consider impacts to the existing capacities of the transportation, water, and sewer systems, and other public facilities and services. In order to assess the impact on infrastructure and services of changes to the Future Land Use and Zoning Maps, the City-County Planning Department shall measure from the potential maximum impact of current policy or regulation to the potential maximum impact of the proposed change in policy or regulation.*

**Staff Analysis:** Existing infrastructure, such as road and schools, is sufficient to accommodate potential impacts. Further detail is provided in the zoning map change report.
