# Introduction

---

## Welcome to the 2022 County Map Book!

The North Carolina Association of County Commissioners is pleased to share this year's county data maps. The maps and data in this book highlight demographic, economic, health, and educational information from North Carolina's 100 counties. We hope this information will help provide context and promote analysis for decisions at the local level.

These categories and data indicators were selected based on research at the county level, recommendations from county officials and staff, and timely policy issues. This year we focused our efforts on refining the Map Book as a reference document. NCACC aims to provide support for all North Carolina county commissioners, and the County Map Book has always been one of the best ways for us to share county-level data. For 2022 we have aimed to improve the readability and ease-of-use for users. Some of these refinements are easy to see, such as the new size or the inclusion of extended data tables for the first time. Other changes are more subtle.

By decreasing the Map Book's size from our traditional legal size (8.5" x 14") to a standard print format (8.5" x 11"), this map collection fits as well in any bookbag or briefcase as it does on a reference shelf or coffee table. We hope that having the County Map Book in this convenient size will encourage its use in everyday topics.

Additionally, many commissioners requested more insight and access to the raw data we use to create our maps, and for that reason we've included an entire page of extended data for each map. In these tables we include all the indicator data for each county, as well as the prior year's data for comparison when possible. We hope that having a comparison to prior-year data will help users form a clearer understanding of where each county lies, as well as changing trends.

For the visualization of this year's collection of maps, we've unified the color schemes into a single gradient of light tan to dark green. Jurisdictions colored in dark green represent the highest levels of the individual map's indicator, while jurisdictions in light tan represent the lowest levels. Our intent is to create a common tie between the color scale and the indicators for each map, so that you will always understand the highs and lows as you move from map to map. *Note: the one exception to this color scheme is on our very first map, Projected Population Change, where population growth values are green and population decline values are tan.*

---

# Acknowledgments

---

**The 2022 County Map Book is a publication of the North Carolina Association of County Commissioners.** The majority of the data come from federal, state, and local sources, and each map includes a citation with the applicable reference.

We thank the organizations and resources that helped with the data collection process including the NC Department of Health and Human Services, NC Department of Public Instruction, NC Department of Revenue, NC Department of Commerce, The North Carolina State Demographer's Office in the Office of State Budget and Management, US Census Bureau, County Health Rankings, Carolina Demography, UNC Chapel Hill Injury Prevention Research Center, and county staff across the state.

This publication is intended for educational and research purposes. Reproduction for commercial purposes without the written permission of the NCACC is not permitted.

## A Note from NCACC Staff

---

The County Map Book is an annual publication, and with each year we hope to incorporate feedback so that the publication can be more useful to you. In order to capture feedback from all readers of the Map Book, we have set up an online survey with prompts for comments, critiques, and questions, as well as ideas for maps or data in future versions of the publication. The survey can be accessed at [www.ncacc.org/mapbooksurvey](http://www.ncacc.org/mapbooksurvey).

# Projected Population Change by 2042

This map shows the projected population change for each county between now and 2042. Counties with the projected growth are shown in green, counties with projected loss in tan. Data source: North Carolina State Demographer's Office.

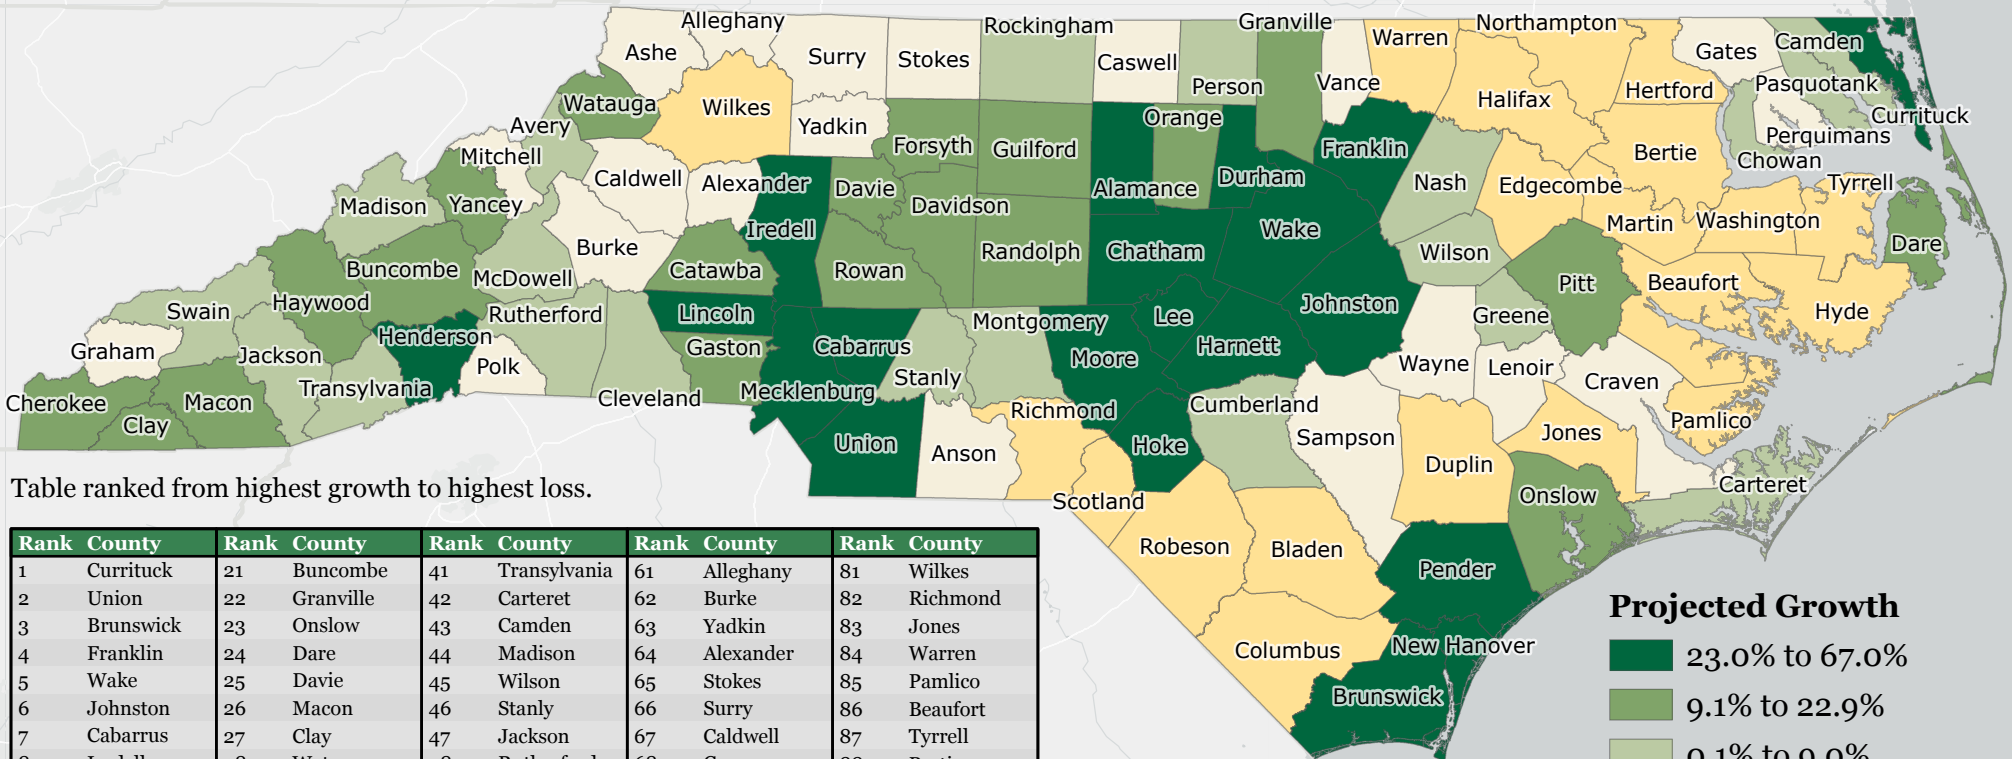

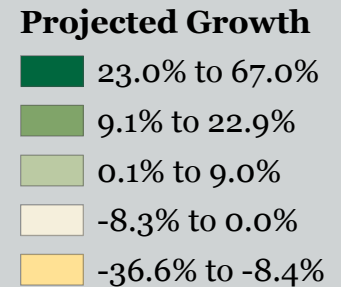

Table ranked from highest growth to highest loss.

# Projected Population Change by 2042

This table shows the projected population change for each county between 2022 and 2042 and each county's growth during the prior 20-year period, from 2002 to 2022. It also shows each county's rank among the 100 counties; a rank of 1 indicates the greatest percentage increase over the specified 20-year time period. Source: North Carolina State Demographer's Office.

# Median Age

This map shows the median age for each county. The median age for a county is the age at which half of the population is older, and half of the population is younger. For 2022, the median age of North Carolinians is estimated to be 39.6 years. The US median age in 2020 was 38.2 years. Higher median ages are shown in green, lower in tan.

Data source: North Carolina State Demographer; US Census Bureau.

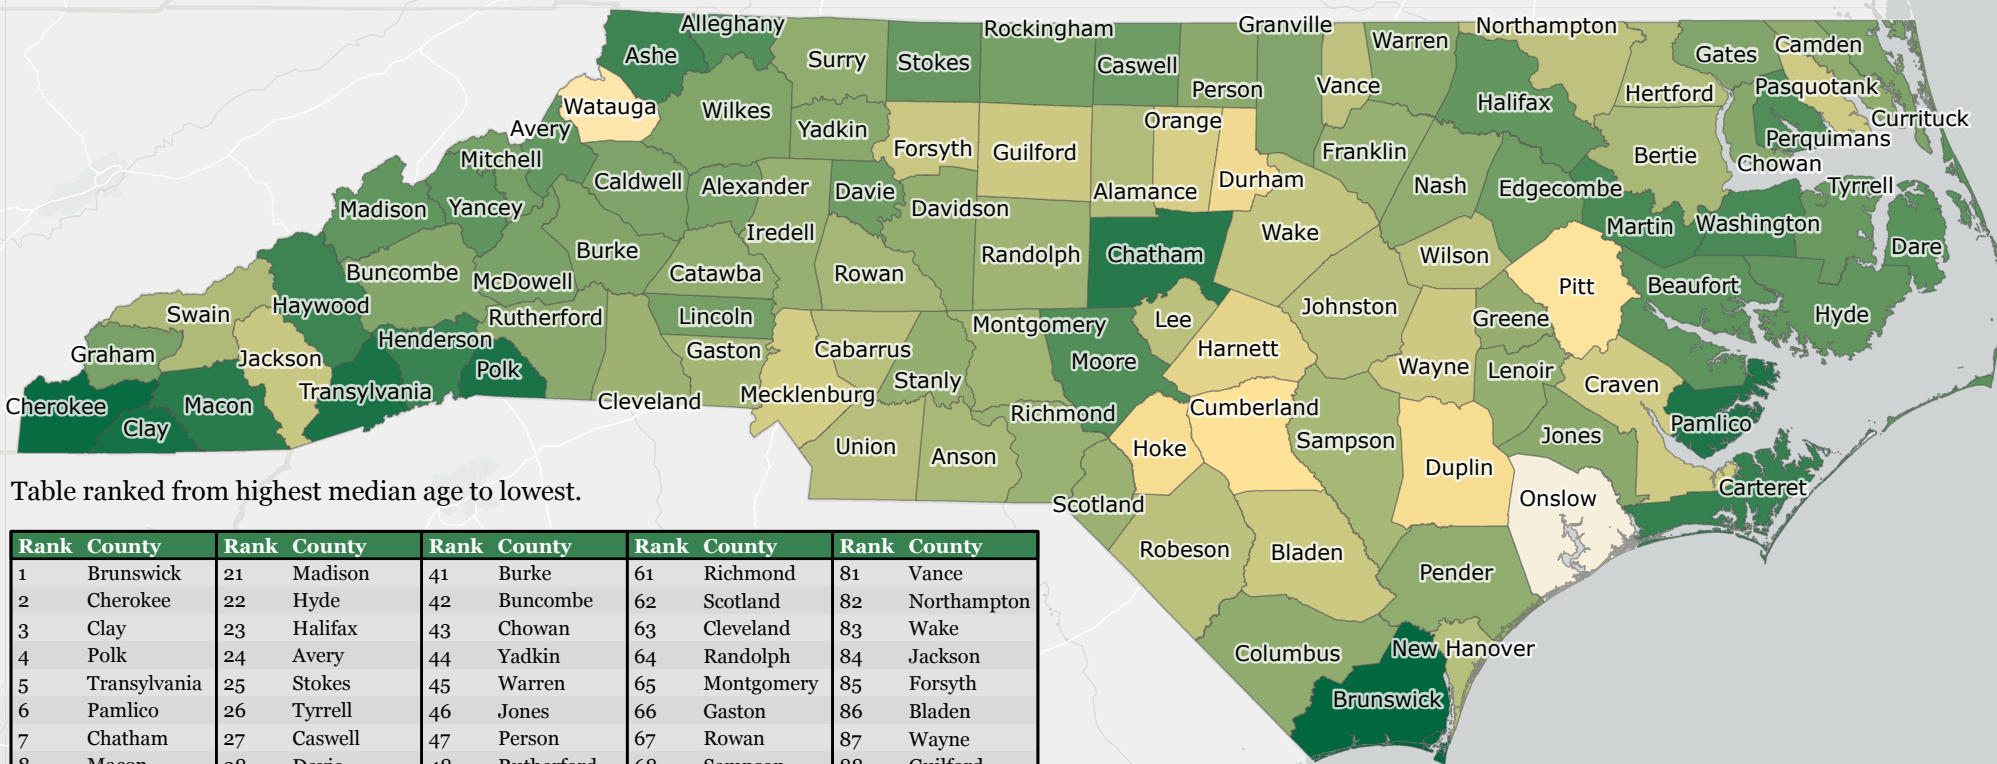

Table ranked from highest median age to lowest.

# Veteran Population

This map shows the percentage of each county's residents who are military veterans. In creating this data, the US Department of Veterans Affairs generally excludes anyone who enlisted within the last 40 years and who did not complete their minimum service requirement, which is typically 2 years. Counties where veterans make up a greater share of the population are shown in green, counties with fewer veterans as a share of population in tan.

Data source: US Department of Veterans Affairs; North Carolina State Demographer's Office.

# Food Insecurity

This map shows, as of 2019, the percent of each county's households experiencing food insecurity at any time during the year. A household experiences food insecurity if it does not have access to enough food for an active, healthy lifestyle for all household members or if access to nutritionally adequate food is limited or insecure. Due to a lack of recent data, map shows 2019 food insecurity and does not reflect the impact of the COVID-19 pandemic. Higher rates of food insecurity are shown in green, lower rates in tan.

Data source: Feeding America, Mapping the Meal Gap.

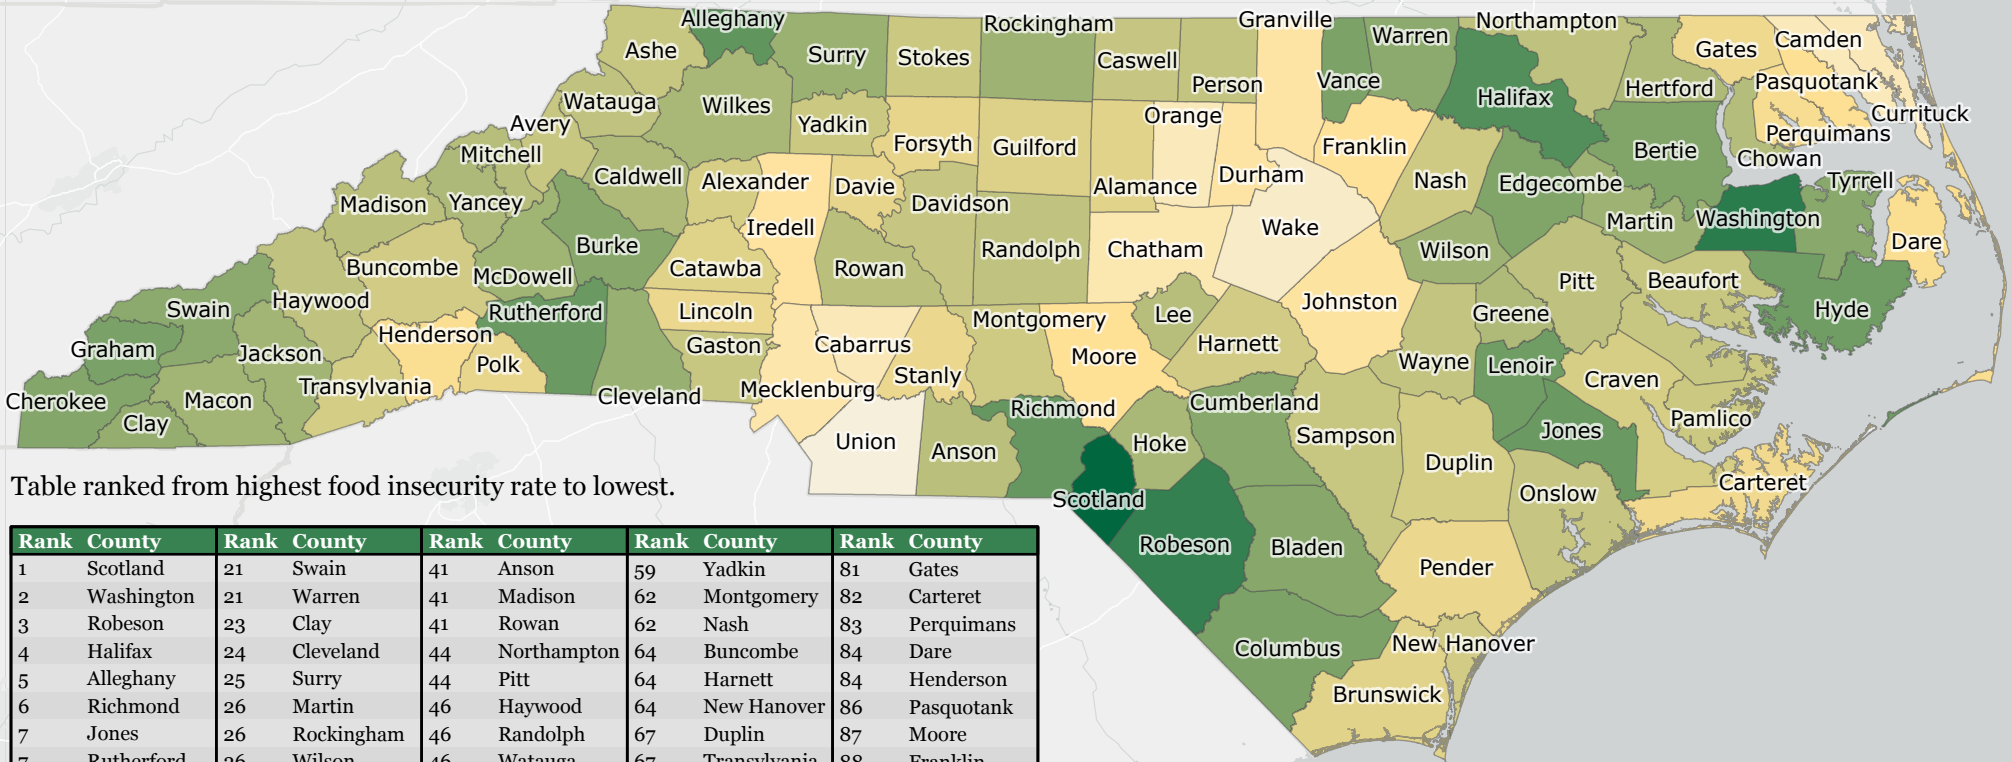

Table ranked from highest food insecurity rate to lowest.

# Opioid Deaths

This map shows opioid poisoning deaths in 2020 as the rate per 100,000 residents. For counties with under 10 deaths, the rate should be interpreted with caution due to the low count. As deaths are only one indicator of the opioid epidemic, this book also contains data on the prevalence of opioid prescriptions. Counties with high death rates are colored in green, low in tan.

# Opioid Prescriptions

This map shows the percentage of each county's residents who were prescribed opioids in 2020. Data is limited to prescriptions that were actually dispensed (i.e., picked up from a pharmacy).

Counties with higher prescription rates are shown in green, with lower rates in tan.

Data source: North Carolina Division of Mental Health Controlled Substance Reporting System.

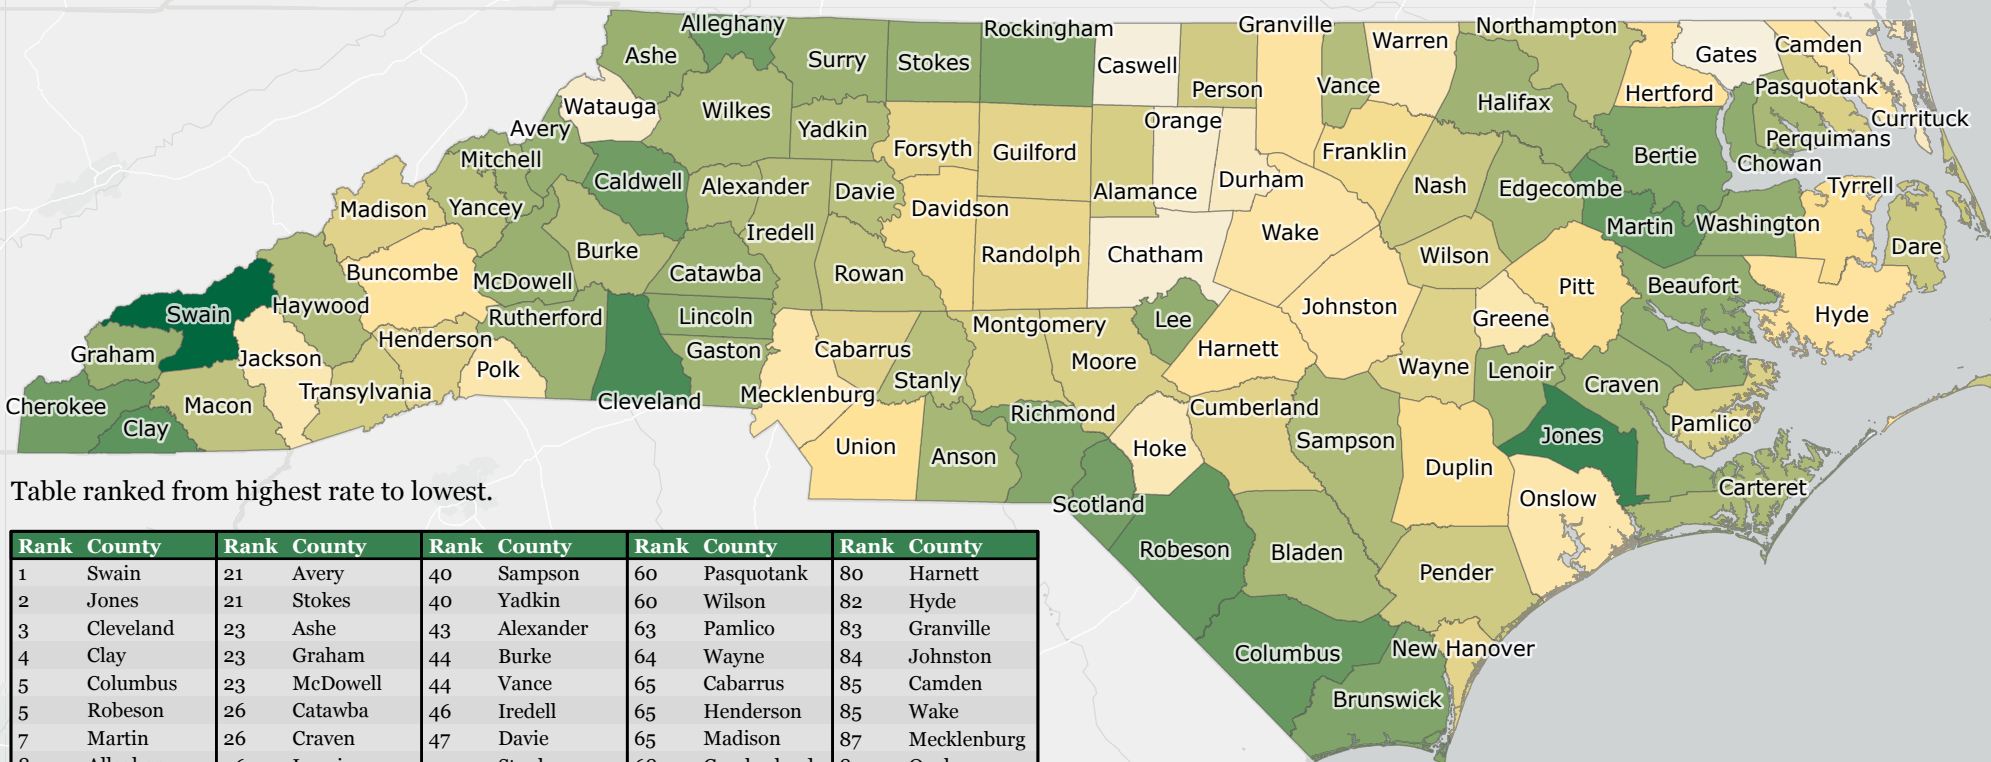

Table ranked from highest rate to lowest.

# NC Pre-K Enrollment

This table shows the percentage of eligible 4 year-olds enrolled in the public NC Pre-K program. The State's Early Childhood Action Plan aims for 75% enrollment by 2030. Rates are calculated by dividing the number of children enrolled by the estimated number of income eligible 4 year-olds. Because some counties enroll more children than the estimated eligible population, some rates exceed 100%. High participation rates are shown in green, low in tan.

Source: myFutureNC.

# Charter School Enrollment

This table shows the percentage of students in each Local Education Authority (LEA) who were enrolled in public charter schools in FY 2020-21. Counties with higher enrollment are shown in green, lower in tan; counties with no enrollment are uncolored. Source: Calculated by NCACC using data from the North Carolina Department of Public Education.

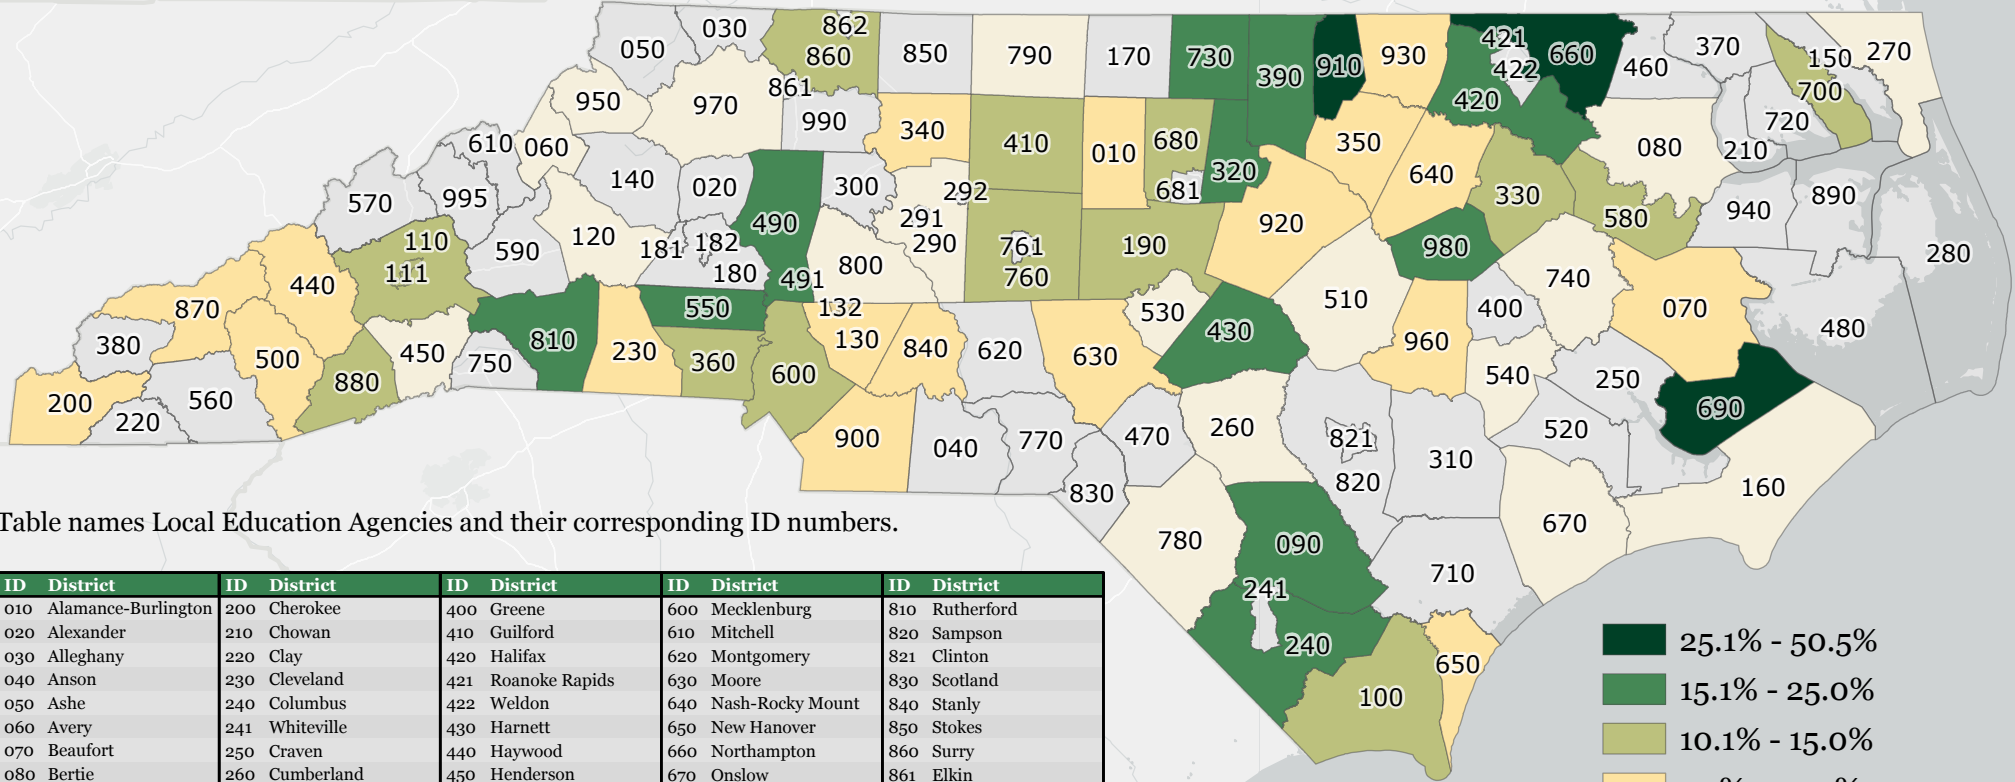

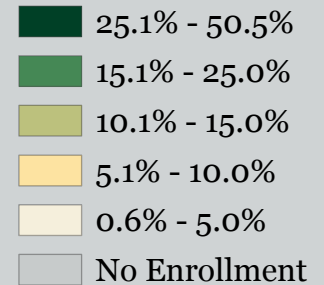

Table names Local Education Agencies and their corresponding ID numbers.

# Local Education Funding Per Student

This map shows the amount of local funding that each county provided for public school expenses, on a per student basis, for FY 2020-21. Although most public school funding comes from the State, counties must fund most capital expenses and at least some operating expenses of their local education authorities (LEAs). Higher per-student funding is shown in green, lower in tan.

Source: North Carolina Department of Public Instruction, School Report Cards.

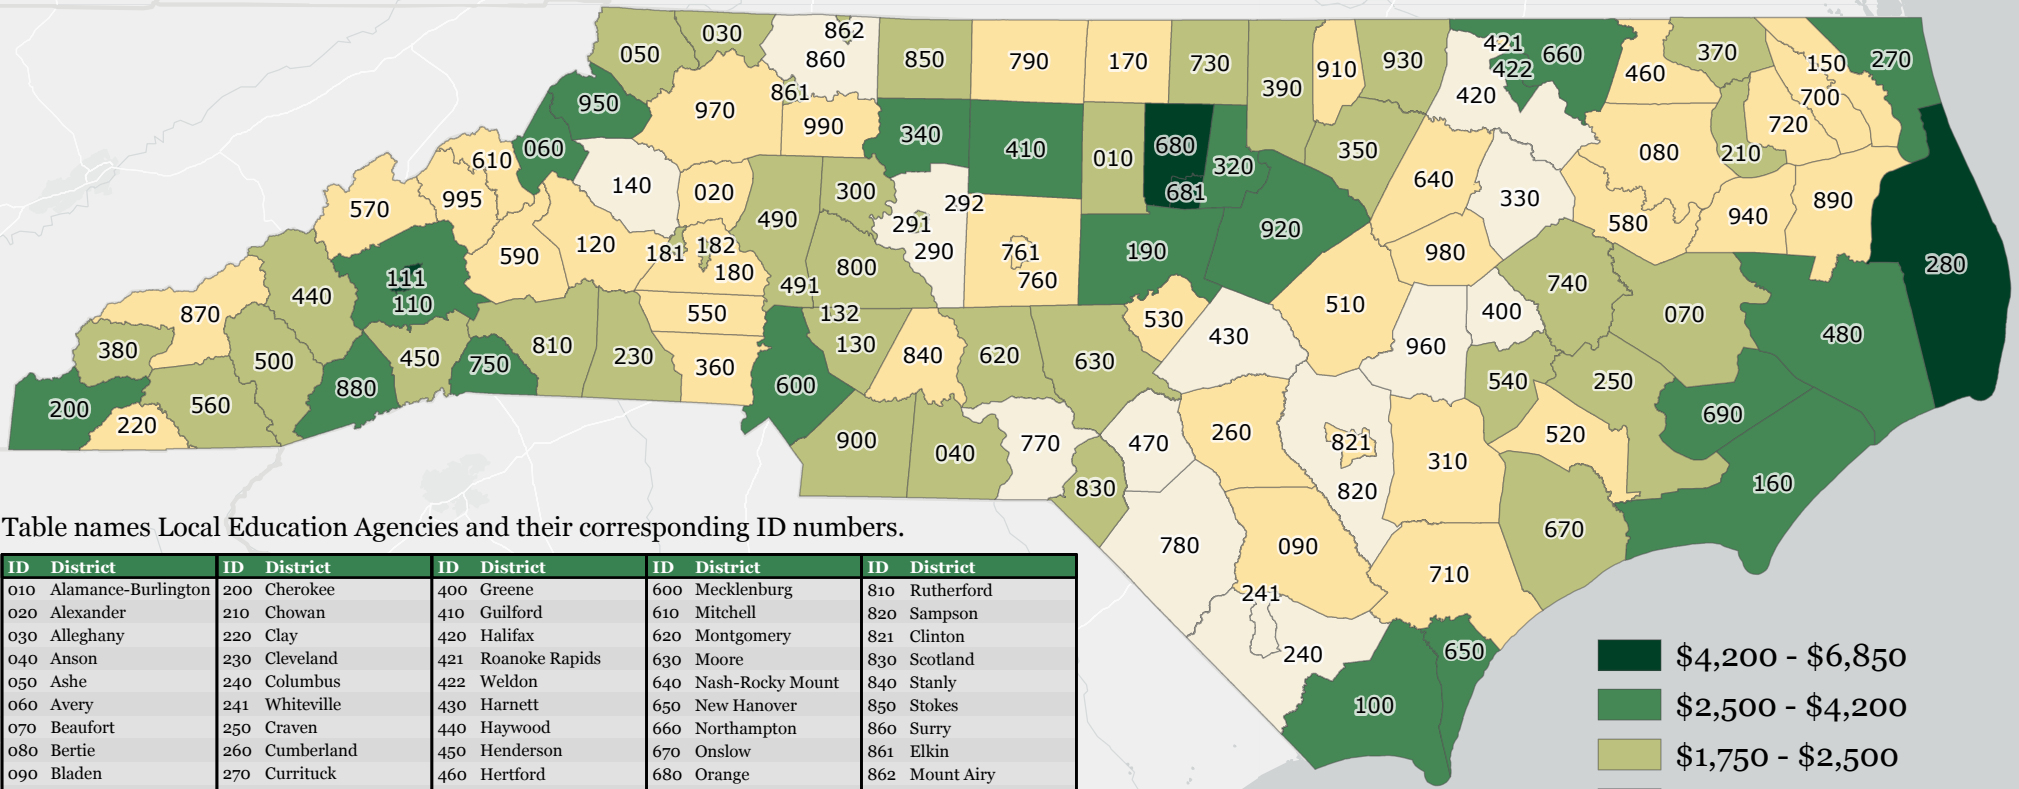

Table names Local Education Agencies and their corresponding ID numbers.

# Local Education Funding Per Student

This table shows local current expense per student in each of the State's 115 LEAs for FY 2020-21 and FY 2019-20. It also ranks the LEAs by funding; a rank of 1 indicates the highest local current expense. "Local current expense" represents funding from counties out of local dollars. # Teacher Salary Supplements

This map shows the average locally-funded teacher salary supplement for teachers in each LEA (school district). Although teacher salaries are State funded, most LEAs provide additional funding on top of the State salary.

Counties with high supplements are shown in green, low in tan.

Data source: North Carolina Department of Public Instruction, School Report Cards.

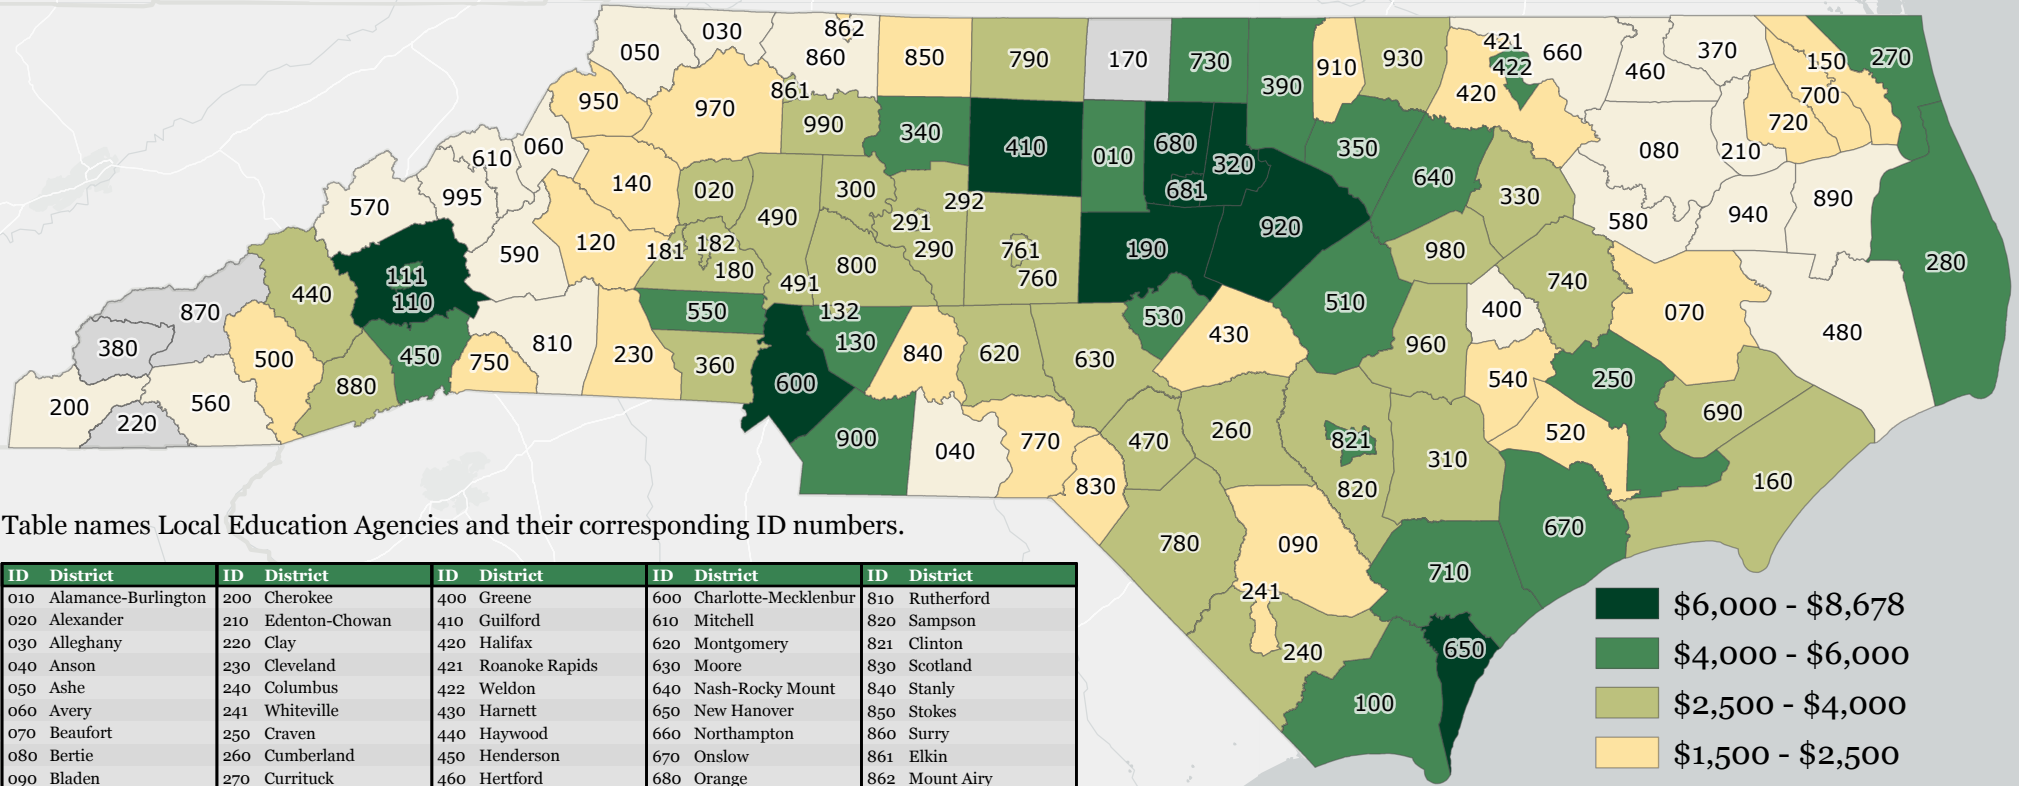

Table names Local Education Agencies and their corresponding ID numbers.

# Opportunity Youth

This map shows the percentage of each county's residents aged 16-24 who were neither in school nor working full or part time, measured over the period 2015-2019. This metric replaces the "Disconnected Youth" metric used in prior versions of this publication. Counties with higher Opportunity Youth rates are shown in green, with lower rates in tan.

Data source: Carolina Demography with myFutureNC.

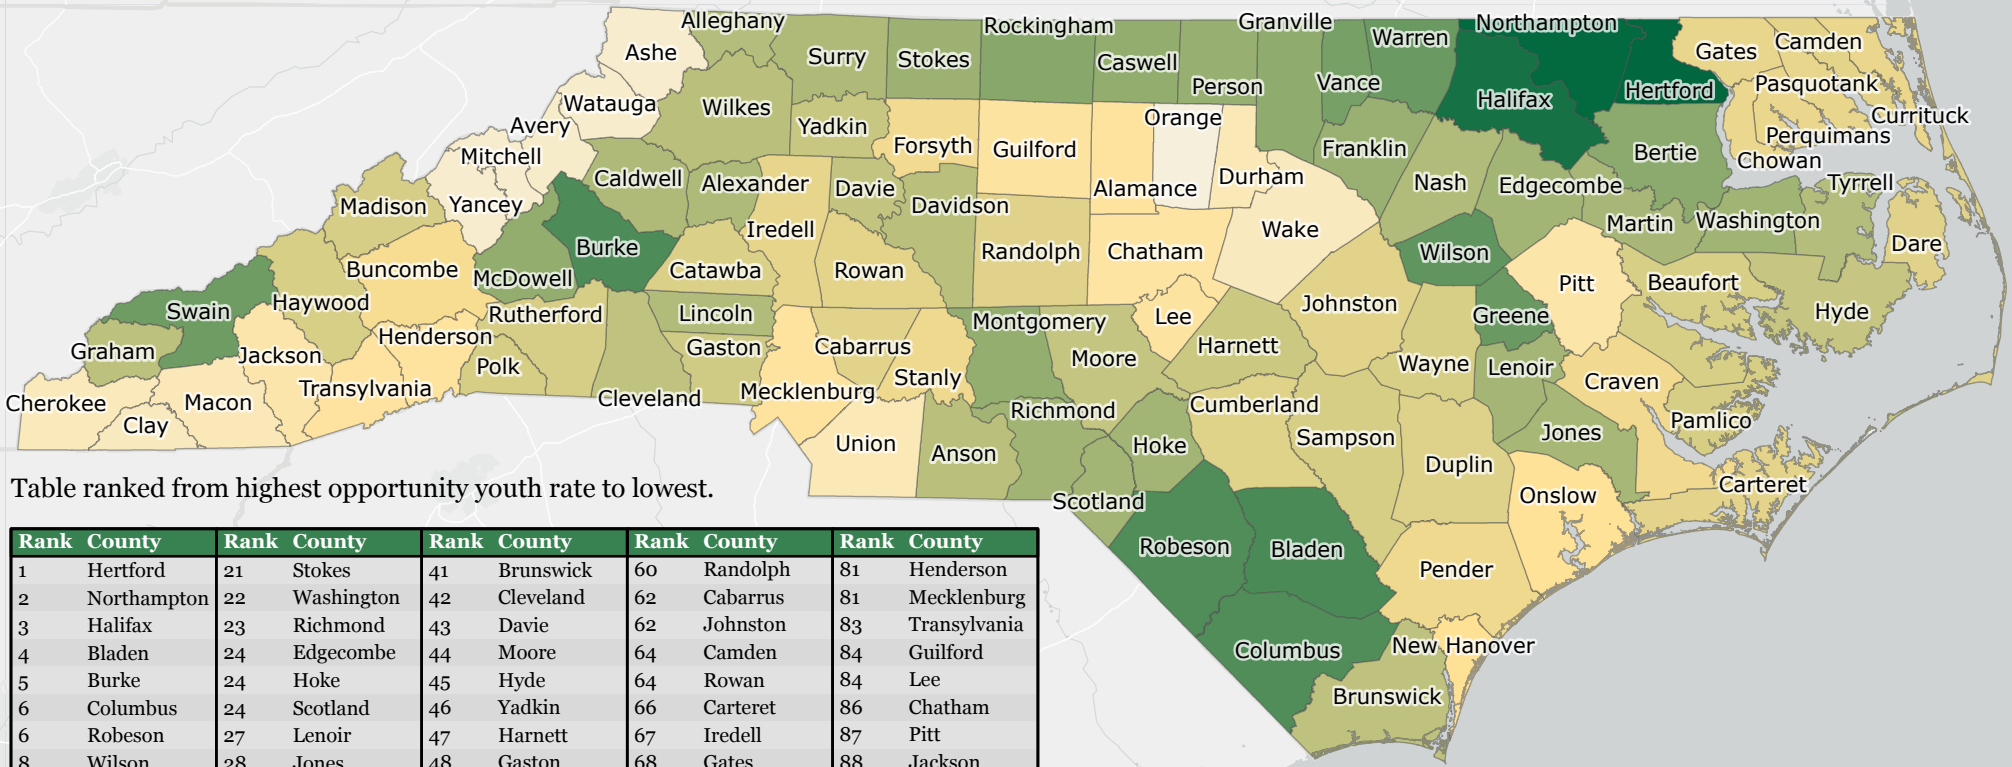

Table ranked from highest opportunity youth rate to lowest.

# Opportunity Youth

This table shows the percentage of each county's residents aged 16-24 who were neither in school nor working full or part time, measured over the period from 2015-2019. This figure includes incarcerated youth who are not enrolled in school.

## Background on This Measure

This "Opportunity Youth" measure replaces the "Disconnected Youth" measure used in prior versions of this publication. "Disconnected Youth" was limited to youth in the 16-19 age range, while "Opportunity Youth" extends to age 24.

Replacing the "Disconnected Youth" measure with "Opportunity Youth" brings the NCACC Map Book in line with standards used by many researchers in the field of youth outcomes. "Opportunity Youth" is used by the Interagency Working Group on Youth Programs, which is composed of representatives from 22 federal agencies that support programs and services focusing on youth. It is also used by myFutureNC and Carolina Demography in their research on youth educational outcomes. Data Source: Carolina Demography and myFutureNC.

# Educational Attainment

This map shows the percentage of adults ages 25 to 44 with a postsecondary degree or credential as of 2018.

North Carolina's goal is to achieve 2 million postsecondary degrees or certificates by 2030.

Counties with high proportions of degree and certificate holders are shown in green, with low proportions in tan.

Data source: Goals and data were developed by myFutureNC, a statewide nonprofit organization focused on educational attainment.

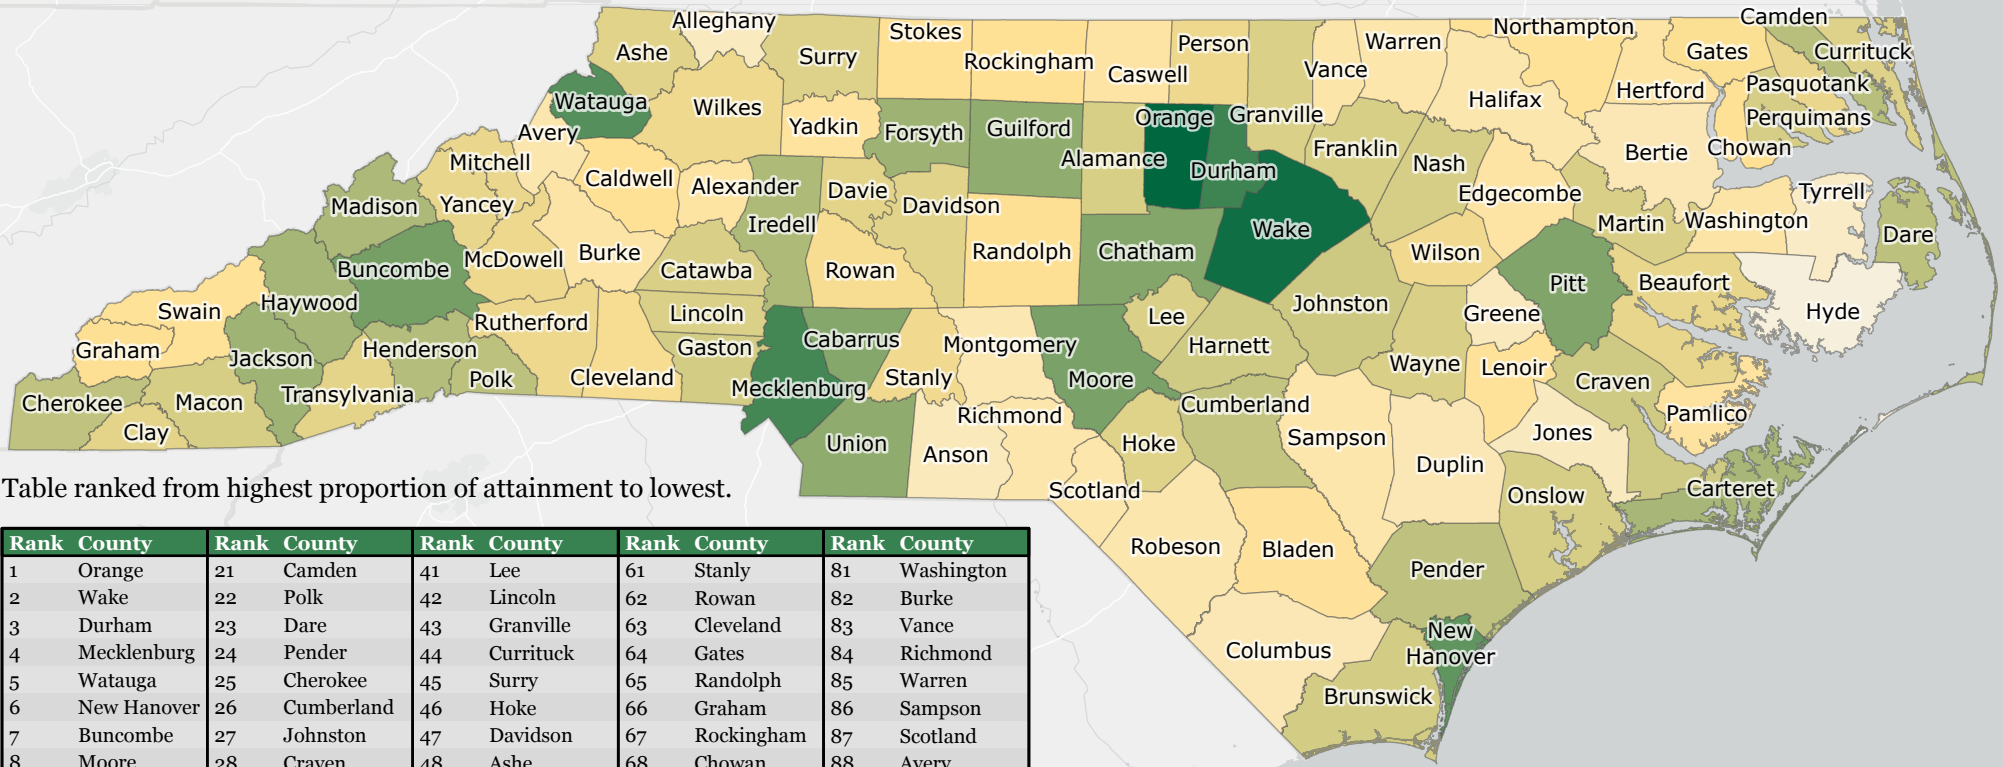

Table ranked from highest proportion of attainment to lowest.

# Computing Device Access

This map shows the percentage of households in each county with at least one computing device, including a desktop or laptop computer, a smartphone, or a tablet. Data are estimates for 2020. Counties where a greater percentage of residents possess a device are shown in green, counties with lesser percentages in tan.

Data source: US Census Bureau, American Community Survey.

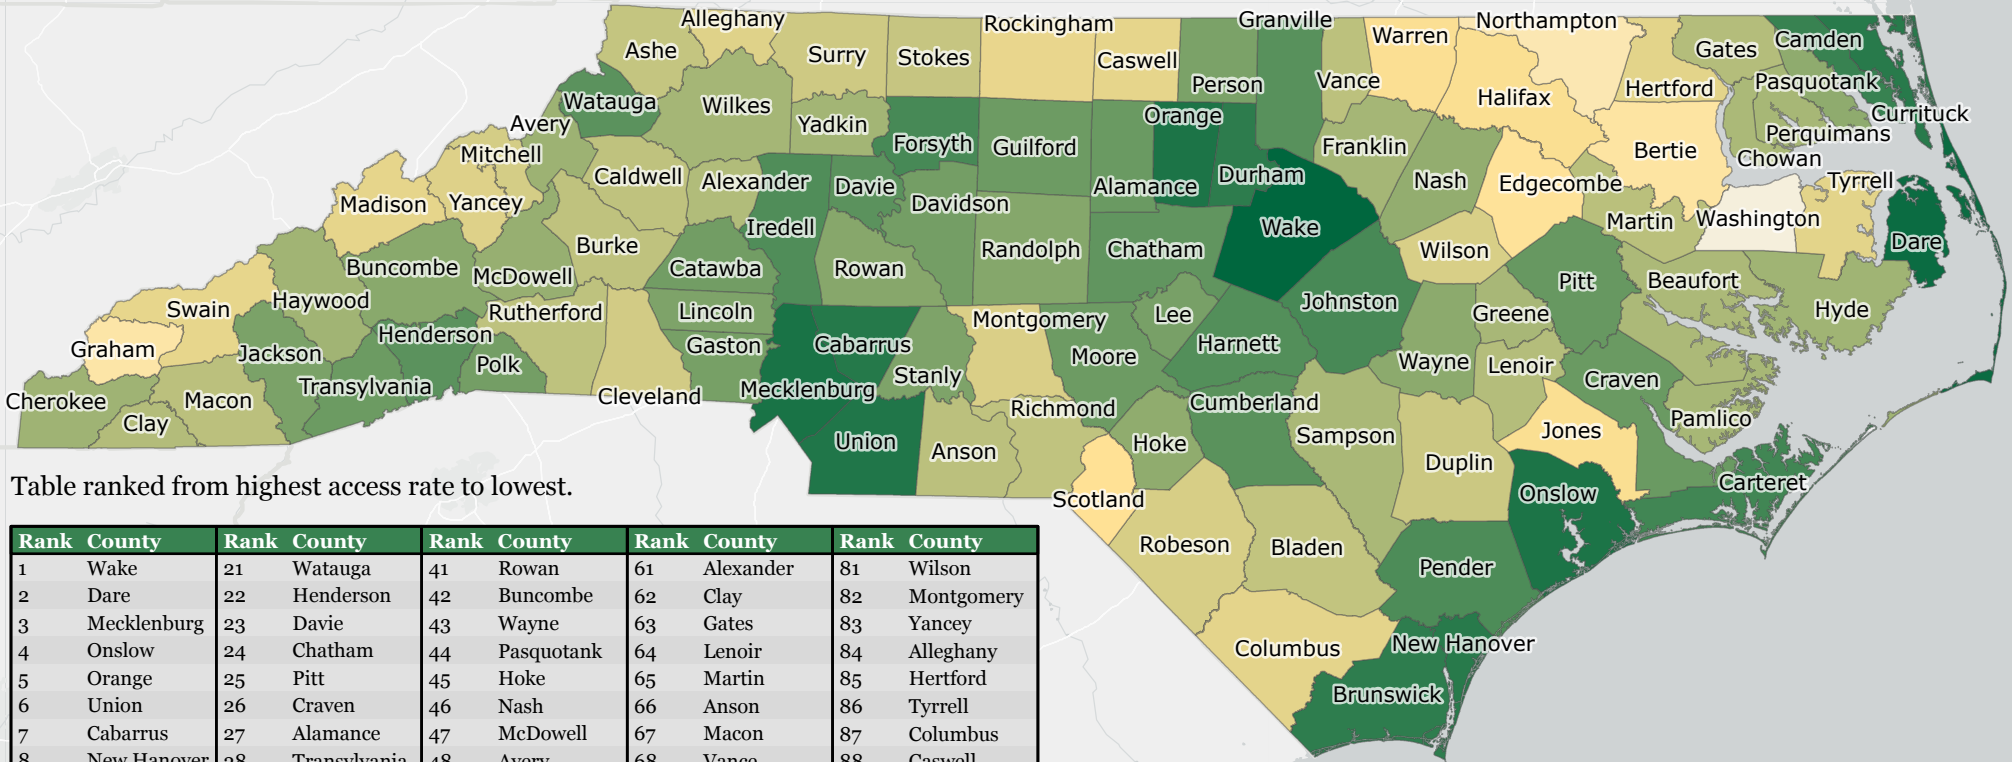

Table ranked from highest access rate to lowest.

# Per Capita Income

This map shows each county's average annual income in 2020 on a per-person basis. A person's income is counted in the county where they live, even if they work somewhere else. Counties with higher per capita income levels are shown in green, counties with lower levels in tan. Data Source: US Bureau of Economic Analysis.

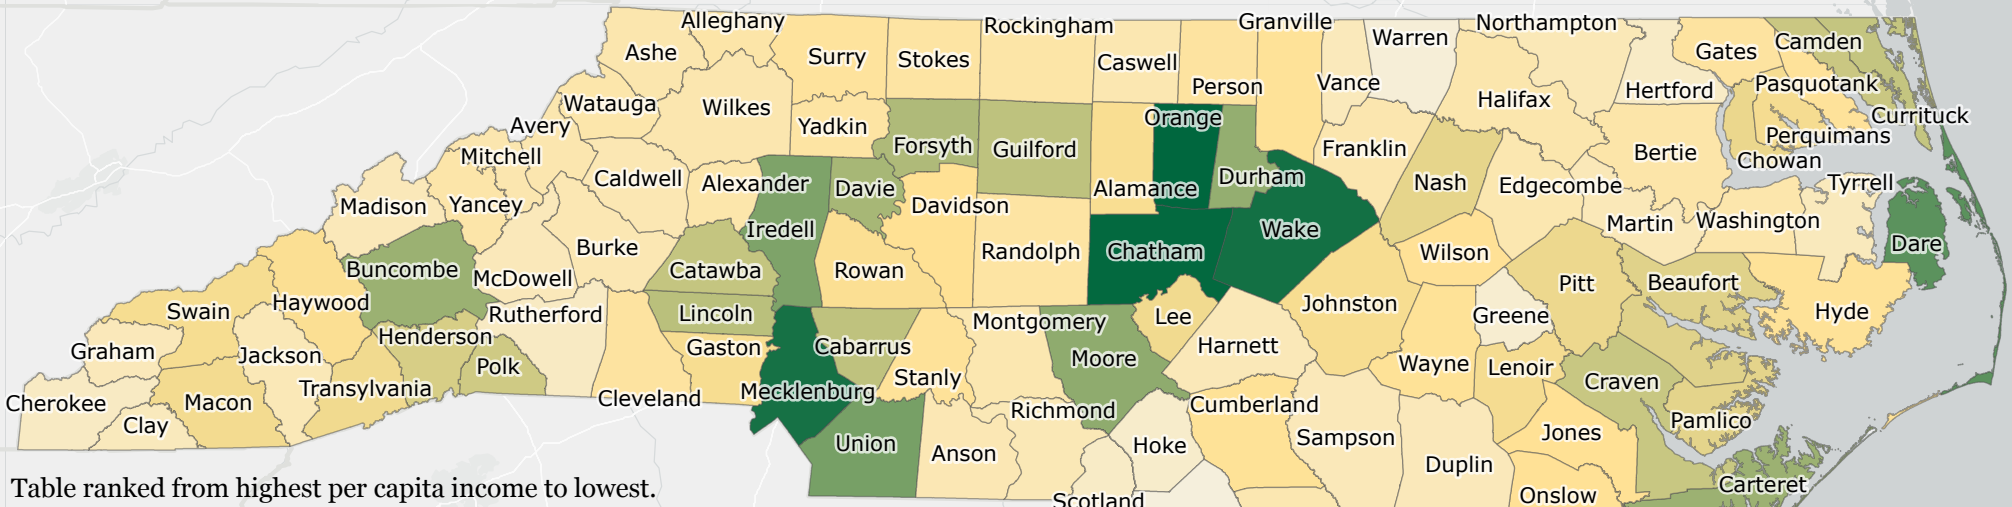

Table ranked from highest per capita income to lowest.

# Average Weekly Wage

This map shows the average weekly wage in 2021 for each county's employed residents, based on the annual employment and total annual wages. This measure excludes a few categories of workers, including members of the armed forces, self-employed workers, and private household workers. Counties with higher average weekly wages are shown in green, counties with lower wages in tan.

Data Source: Bureau of Labor Statistics, Quarterly Census of Employment and Wages.

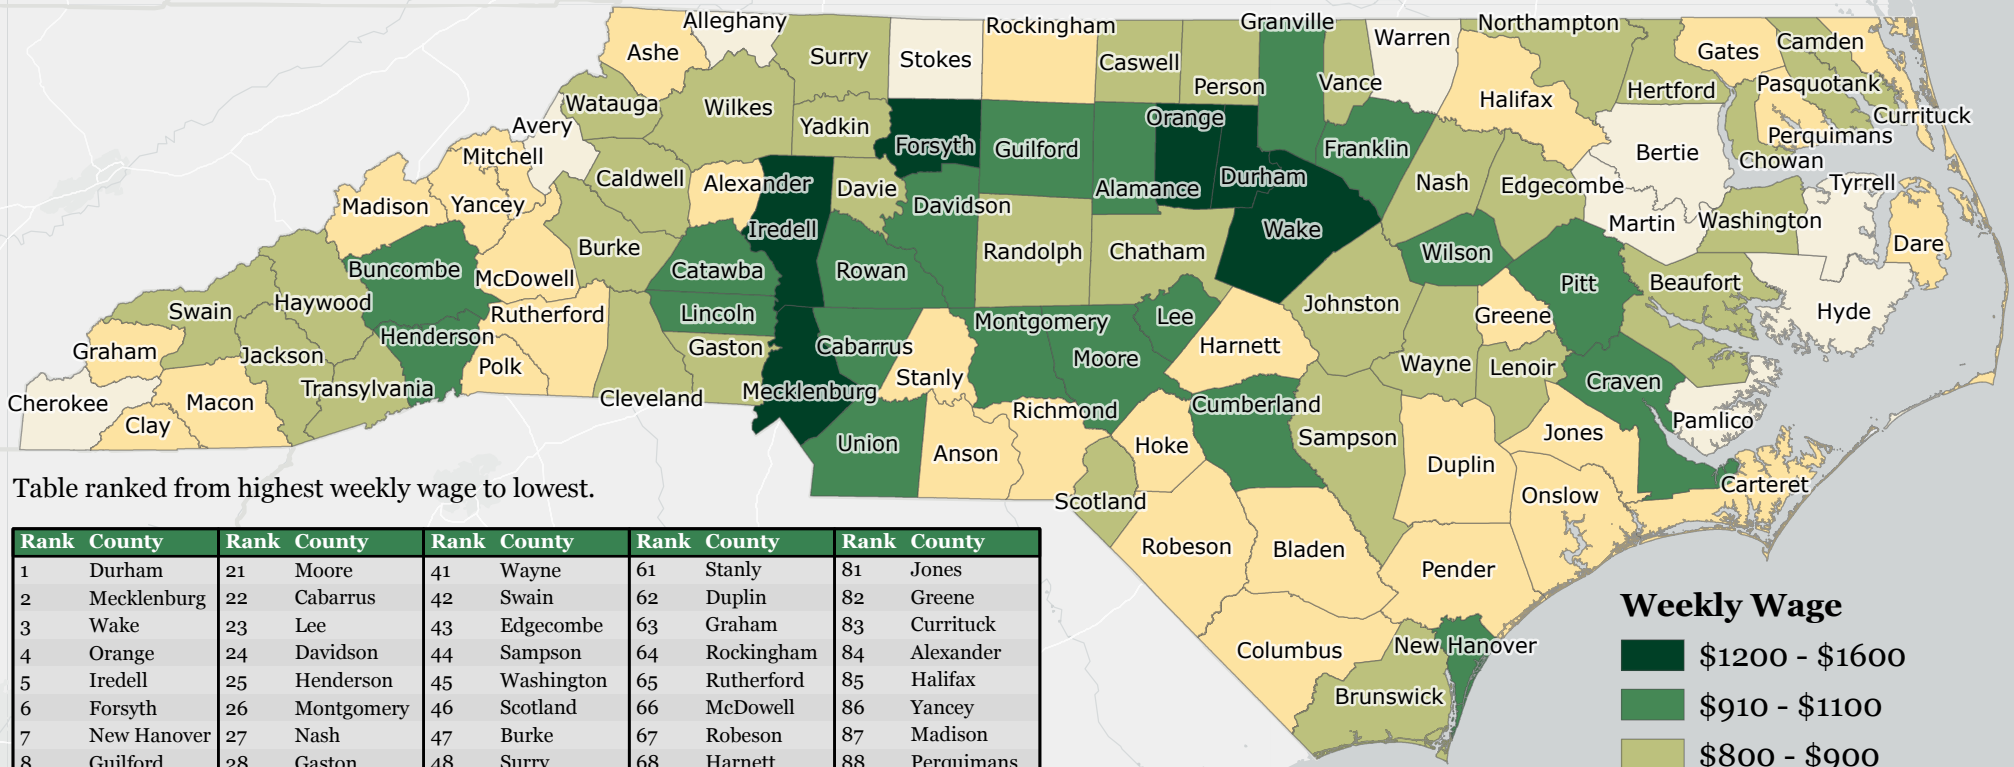

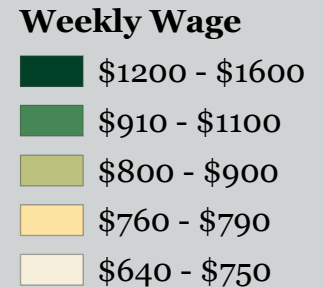

Table ranked from highest weekly wage to lowest.

of County Commissioners

# Taxable Property Per Capita

This map shows each county's total assessed property valuation on a per capita basis for FY 2021-22. North Carolina counties have \$1.38 trillion in taxable property with a Statewide average of \$131,137 per capita. Counties with higher valuation are shown in green, counties with lower valuation per capita in tan. Data Source: North Carolina Department of Revenue; North Carolina Office of State Management and Budget

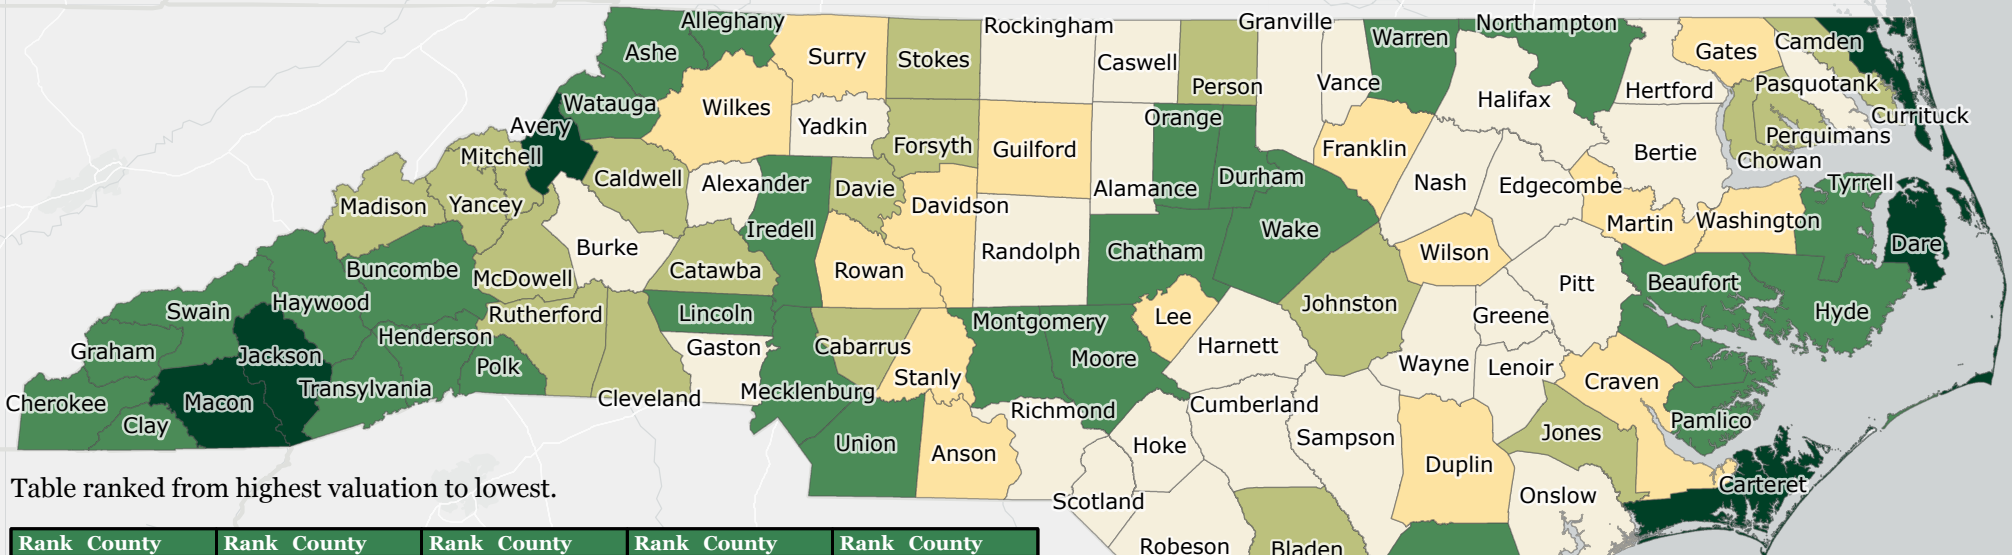

Table ranked from highest valuation to lowest.

# Local Option Sales Taxes

This map shows local sales and use tax rates as of July 1, 2022. All counties levy the first 2¢ of local option sales taxes. Some also levy Article 43 (the optional quarter cent) and/or Article 46 (the transit tax). Counties are colored according to tax bracket.  
Data source: North Carolina Department of Revenue.

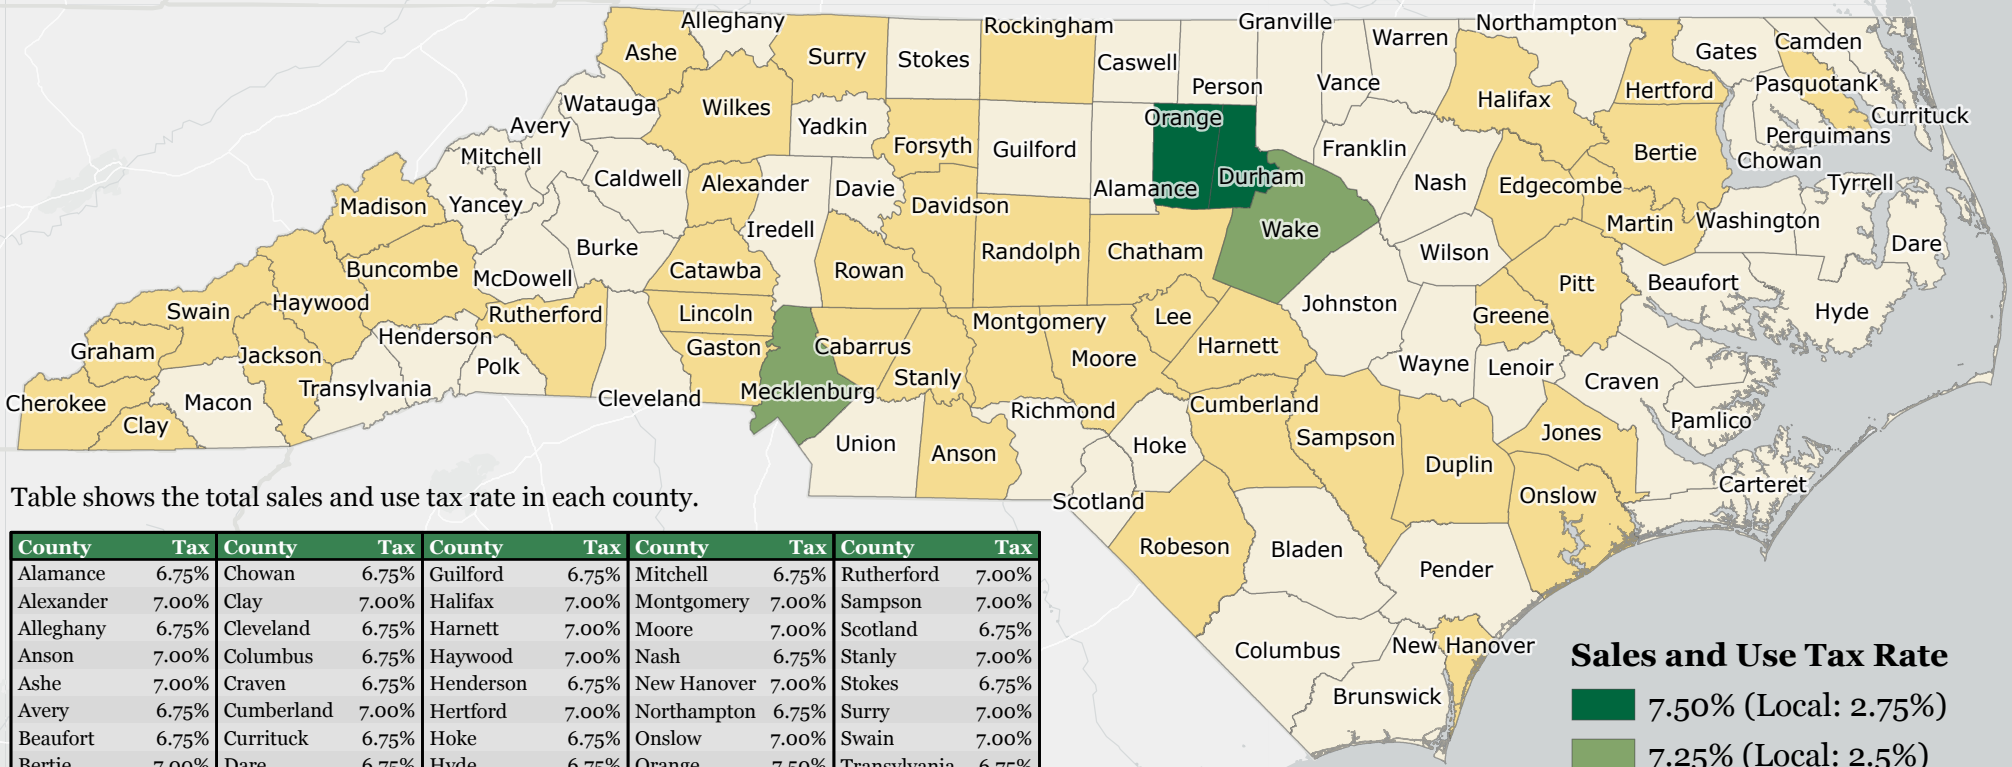

Table shows the total sales and use tax rate in each county.

County	Tax	County	Tax	County	Tax	County	Tax	County	Tax
